DUQUES HALL, 6TH FLOOR
2201 G STREET, NW • WASHINGTON, DC
Highlights from the gw business plan competition

Friday, April 13, 2012
In recognition of George Washington, one of America’s earliest entrepreneurs, GW continued to grow its annual Business Plan Competition in 2012. For the fourth year, we offered strong educational resources plus nearly $75,000 in prizes for the best and brightest of our future entrepreneurs. GW is committed to providing the support and mentoring essential to the successful creation of innovative new enterprises.

2012 was the year entrepreneurship went viral at GW. Some 144 student-based teams, nearly 30% more than last year, entered the competition. For the first time, they included students from all 13 GW schools and colleges. Likewise, the quality of the business plans increased. In the final round of presentations, all eight teams had already launched their businesses or could demonstrate a prototype of their product for the judges.

The number of sponsors increased dramatically, from 10 to 14. We continue to add more of GW’s schools and colleges as sponsors, while the number of external sponsors grows. This year, Capital One Bank became the competition’s first premier sponsor. This was made possible by Capital One’s “Investing for Good” program, which is designed to support expanded economic opportunity for individuals and small businesses.

Our increased number of sponsors allowed an increase in the seed capital and prizes awarded to the winning teams—nearly $75,000 in total. Among the prizes added was a cash prize for the winner of an Audience Choice Award. Each year the number of viewers of the final rounds presentations, both on the campus and online via a live Internet stream, has grown. As a result, this year we offered viewers the opportunity to vote for their favorite team via Twitter.

While WiseAgg won the $25,000 first place prize, AthleteTrax won second place, as well as the award for the best undergraduate team and the Audience Choice Award.

We want to offer a special thanks to the 72 judges and mentors without whom the Business Plan Competition would not be possible. All worked tirelessly to make this event successful.

Next year, in our fifth annual competition, we look forward to welcoming new teams comprised of GW students, alumni, and faculty. If you would like to participate as a judge, mentor, sponsor, entrant, or to learn more about the GW Business Plan Competition, please contact us.

**gw business plan competition**

**mentor program**

Mentors have proven to be such valuable assets to our student-based teams for the last two years that we upgraded the role of our mentors in 2012. Again, we offered a mentor to each of the 32 teams that advanced past the first round. However, as a result of a new GWERT (GW Entrepreneurs Roundtable) mentoring program, we were able to offer some teams more than one mentor.

Below are the 42 mentors who gave so generously of their time and experience between mid-February and mid-April as the teams wrote their business plans and advanced in the competition. Some continue to work with their teams. Many are GW alumni, as indicated by their degrees; all are experienced entrepreneurs and investors who can speak from personal experience regarding what it takes to succeed. We offer our sincere gratitude to them all.

WiseAgg is the Google for analysts—i.e., for people who want not only individual webpages, but also a birds-eye view of the entire deep web sphere.

Evoluggage designs, manufactures, and sells Scooter Backpacks, a new generation of backpacks and other luggage that you can wear, roll, and ride!

Capital Kombucha: 'A modern twist on an age-old recipe. Crisp, refreshing, healthy—it’s your new favorite drink from DC’s first kombucha microbrewery.'

AthleteTrax is a web-based client management platform for collegiate athletic administrations and their student athletes to increase productivity.

Fundzy is an online fundraising platform that enables small organizations to offer their supporters great incentives that are typically only offered by large organizations.

Imagnus Biomedical: 'It makes quality and cost-effective biomedical instruments that offer advanced solutions to problems in research and medicine.'

Mr. Braithwaite, vice president for Capital One Bank, joined the company in 2011. With over 10 years of experience in the financial service industry, she has focused on business banking for the last five years. Her areas of expertise include not-for-profits, property management, government contracting and settlement, and title companies. Ms. Braithwaite belongs to several professional groups and volunteer organizations in Washington, DC. She graduated from Howard University and has a passion for entrepreneurship. Being the daughter of an entrepreneur and having watched her father manage and expand his business for more than 27 years, inspired her to help other businesses succeed. Ms. Braithwaite presented this year's Best Undergraduate Prize.

Mr. Miller joined Highlander Partners in 2006 to lead the firm's private equity efforts in the healthcare sector. Mr. Miller has served as the chairman of MHS Holdings (Nasdaq: MHSY) since 2000, as CEO from 2000 to 2005, and currently is a director of this company. From 1985 to 1996, Mr. Miller served as president and COO of EmCare Holdings, Inc., and prior to that, he held financial and management positions in the healthcare industry. Mr. Miller is also a director of LinClinc Holdings, Inc. (Nasdaq: LINC), a provider of oxygen and other respiratory therapy services, and Pioneer Surgical, a manufacturer of spinal and orthopedic implants. Mr. Miller holds an M.B.A. degree from the George Washington University and a B.S. in accounting from University of Scranton.

Ms. Guimard most recently served as the vice president of business and marketing for Harris Media, LLC, a nationally acclaimed media and communications firm with clients in 11 states. Prior to working at Harris Media, LLC, Ms. Guimard served as the retail & e-commerce specialist for HirePage Networks, working with large enterprises to implement social software into their corporations. Prior to that, she founded Aljir.com, an internet healthcare company that enabled patients to choose doctors based on price. She sold Aljir.com to Healthgrades, LLC, in 2009. Allison also dabbled in fashion design (a passion of hers), launching her own fashion line in 2009. She and her husband, Pierre, are proud new parents of their first son, Auguste, who is now four months old. After the birth of her son, Allison has been doing digital marketing on a consulting basis. Ms. Guimard acquired her B.B.A. from the GW School of Business in 2005.

Mr. Liu joined the Rustic Canyon Partners' team in 2004 with 25 years of diverse technical and management experience. Prior to joining Rustic Canyon Partners, he served as the director of network technology development at NEC, where he and his team evaluated emerging telecommunication technology focusing specifically on networking technology development and deployment for networks that today provide the backbone of the Internet. Mr. Liu is also a proven entrepreneur. He was the co-founder and vice president of market development at Avanex, where he helped the company grow into one of the largest optical component suppliers worldwide during the period of 1997-99. Currently, Mr. Liu serves on the Technical Advisory Board in various companies and is an active angel investor in early startups; he was one of the angel investors and former board member of Renren Inc. (NYSE: RENN), "Chinese Facebook." Mr. Liu earned a degree in communications from the George Washington University.

Ms. Selby is the co-founder of Selby Winery, a company she founded in 1994 in Healdsburg, CA. After graduating with a master's degree in business administration from GW's School of Business in 1985, she decided to remain in the wine industry. Selby's hands-on approach to winemaking is the reason she continues to have great success in this competitive business for the past seventeen years. She advanced through the corporate ranks of the wine industry from being tasting room manager to cellar-hand, and eventually winemaker. She uses the knowledge and experience she has gained along the way to focus on the smallest detail; this has led her to create some of the most elegant wines around.

(NYSE: FNNM), "Chinese Facebook." Mr. Liu earned a degree in communications from the George Washington University.

Ms. Selby is the co-founder of Selby Wineery, a company she founded in 1994 in Healdsburg, CA. After graduating with a master’s degree in business administration from GSB School of Business in 1985, she decided to reinvent herself and, after a business trip to Napa Valley, Ms. Selby decided to leave the corporate world to pursue her dream of joining the wine industry. Sarah’s hands-on approach to winemaking is the reason she continues to have great success in this competitive business for the past seventeen years. She advanced through the corporate ranks of the wine industry from being tasting room manager to cellar hand, and eventually winemaker. She uses the knowledge and experience she has gained along the way to focus on the smallest detail, this has led her to create some of the most elegant wines around.
For the first time in the history of the GW Business Plan Competition, we introduced the Audience Choice Award. All final eight teams were eligible to compete for an additional award of $1,000. The award winner was determined by the viewers at home and by the live audience with no limit to the number of votes.

The audience could vote for its favorite team by using the combination of qgwbizplan and the team-specific Twitter hashtag assigned to each team in its tweets:

- WiseAgg #GWWhiteagg
- Evoluggage, LLC #GWWhiteagg
- Capital Kombucha #GWKombutho
- International Education Enterprises, Inc. #GWIEE
- AthleteTrax #GWtundzy
- Fundzy #GWFundzy
- Imagnus Biomedical #GWImagnus
- College & Cook #GWCollegeCook

The Audience Choice Award was announced at the networking reception. We received a total of 1,706 tweets for all teams throughout the day of the competition finals. The winner was AthleteTrax, with a total of 803 tweets, and thus, with the Audience Choice Award added, the team took home a total of $21,000 in cash prizes.

Dr. Terry Collins is vice president and general manager for Electronic and Mission Systems, a division of Boeing Network and Space Systems. This division includes Argon ST, which was acquired by Boeing in 2010. Dr. Collins served as chairman and CEO of Argon ST prior to its acquisition. In 1997, he was the founding chairman and CEO of Argon Engineering Associates, which merged with SenSyTech in 2004 to form Argon ST.

Dr. Collins holds a B.S.E.E. from the Massachusetts Institute of Technology, an M.S.E.E. from the University of Wisconsin, and a Ph.D. in electrical engineering from the George Washington University. He currently serves on the National Advisory Council of GW's School of Engineering and Applied Science.

GW Business Plan Competition
Features Student, Faculty Ingenuity
April 16, 2012

If the vast amount of information available on the Internet is envisioned as an inexhaustible, traditional search engine like Google only uncover the very tip. That's why Zhuojie Zhou and Nan Zhang developed WinAugg, a search engine for analysts. The engine, which works on a regular computer, uncovers analytics for beyond what a normal search engine can find, giving the user valuable "deep-web" data. This idea was so innovative that judges at GW's fourth annual Business Plan Competition awarded it the top prize of $52,000 in cash and in-kind investments.

Mr. Zhou, a Ph.D. student in the School of Engineering and Applied Science, and Dr. Zhang, a GW assistant professor of computer science, also won the Plug and Play Tech Award, which will cover travel expenses and provide for the team to attend a "start-up-accelerator" seminar in Silicon Valley to help refine their business idea.

"The presentations were all very strong and diverse, so we were very excited," Mr. Zhang said. He and his partner won the prize capital to complete the development of the system, as well as work on customer acquisition. The money will also be used to cover some data acquisition costs, he said.

Mr. Zhou said there is a lot of development ahead for the team, but he's excited. "This will take some time, but I think it's a promising project," he said.

The winners best out seven other teams in Friday's final competition. In earlier rounds, the field was narrowed from 144 initial applicants representing all of GW's schools—the largest number of participants in the competition's history. Thirteen semifinalists, who were invited to develop full-fledged business plans. All groups were encouraged to take part in educational workshops, feedback and pitch sessions and a mentoring process while developing their ideas, said Jim Chiang, director of GW's Office of Entrepreneurship.

The $10,000 second prize went to AthleteTrax, a web-based client management platform for college athletic administrations and student-athletes to increase organization and productivity. The AthleteTrax founders—Joe Halpern, Reinaldo Corrao, Elizabeth Zander and Brian Gross, all GW alumni—also won the best undergraduate team award of $1,000 and the Audience Choice Award of $1,000, and the total winnings: $2,000. Pitch testing of AthleteTrax using several GW athletic teams will begin next fall, with a test including all varsity teams slated for the spring.

"We were just excited to be in the top eight teams," Mr. Corrao said. "We aren't really used to investors yet, so this money really allows us to delay that and focus on our product."

The third prize of $4,000 went to Fundy, conceived by junior Dylan Fox, funded in an online fundraising platform that allows small organizations without official nonprofit status—such as sports teams and volunteer groups—to raise money while giving incentives to their donors. Fourth prize ($3,000) went to IcePops Biomedical, started by seniors Nathaniel Dishkey and Caitlin Keating to market their cost-efficient freeze-regulatory device for use in medical settings.

"We didn't have a good support organization at that time for feedback and mentoring, and most importantly seed capital. So I sifted all these things in to the competition, and made it open to anyone on campus," he said. "Since then, the quality of the competition has gone up significantly. Regardless of whether students are part of the winning team, I hope they've learned enough through the process of mentoring and constructive feedback that they will be able to achieve their dreams of starting a business."

Mr. Zhang said he was extremely proud of the finalists' work on their concepts, as well as their presentation skills and their professionalism. "The judges were blown away," he said. "The quality and the depth of talent is getting better and better, and this is only your four."

The event, held in Dupras Hall, is funded by entrepreneurs Florida Gov, Richard Scott Jr. and his wife, Annette, whose daughter Allison Guimard, B.A.R./'99, is also an entrepreneur. Additional sponsors this year included Capital One Bank, Tech Cocktail, Blank Rome LLP (Strategy Labs), Plug and Play Tech Center and Brazen Carenets.

Business Plan Competition
Winners Look to Dig Deeper than Google
April 13, 2012

An assistant professor of computer science and a Ph.D. candidate in the School of Engineering and Applied Science were awarded a first-place $25,000 investment for their business startup Friday at the fourth annual GW Business Plan Competition.

Nan Zhang, who has been teaching at GW for four years, and Zhuojie Zhou are the brains behind WinAugg, an analytics tool for diving into the relatively untouched "deep web"—an area of the internet consisting of information databases that has been left untouched ever by major search engines like Google.

"We started with the simple motivation that there are already resources out there, but nobody knows those big-picture views of those databases," Zhang said. "We found that there are so many deep web resources out there, we can really make some information that people can't easily get today."

Zhang and Zhou made use of eight teams that beat out a pool of more than 140 entries to make the final round of the competition, which took place today.

The teams spent the last two months hammering out the details of their infant enterprises, attending workshops and receiving guidance from experienced entrepreneurs with the ultimate goal of jumpstarting their companies and earning a hefty investment.

Zhang said the bulk of the prize money will go toward the further development of the WinAugg program, supplementing grant money the team already received from the National Science Foundation that assisted their research and helped identify business prospects.

AthleteTrax—a program to help student-athletes keep up with schoolwork and maintain high GPAs even while traveling for sporting events—plated second with a $10,000 prize. The team included sophomore business school students Jan Halpern, Reinaldo Corrao and Elizabeth Zander and Brian Gross. AthleteTrax earned another $10,000 when the four won the best undergraduate prize.

For the first time in the competition's history, an additional $1,000 prize was given to a team determined by votes from the audience. This award also went to the AthleteTrax project.

Fundy, an online fundraising platform championed by junior Dylan Fox, took third place. Senior Nathaniel Dishkey and Caitlin Keating earned fourth place with IcePops Biomedical, which presented cost-effective biomedical solutions.

The team's presentations were judged on their originality, financial planning, investment potential and passion for the project, among other criteria.

The competition's $100,000 total prize money is co-sponsored by Florida Governor Rick Scott, whose daughter is an alumnus.

WiseAugg wins $250,000 at GWU Business Plan Competition
April 16, 2012

A "Google for analysts" business pitch took home top honors and $25,000 at the 4th annual George Washington University Business Plan Competition on Friday.

WiseAugg, which collects and analyzes large amounts of data from Web sources not normally covered by genetic search engines, is the brainchild of Zhuojie Zhou, a GW graduate student and Nan Zhang, a computer science professor. WiseAugg was one of eight finalists that presented their business ideas to a panel of entrepreneurs, investors, venture capitalists and alumni on Friday.

Those eight were selected from an initial pool of 144 teams from various schools and departments across campus, marking a 30 percent increase in participation over 2011. The Namen-up was AthleteTrax, an online client management platform for college athletic administrators and their student-athletes.

The GW Business Plan Competition awards more than $50,000 in cash prizes to teams of GW students, faculty and alumni who have innovative ideas for new products or services. The event was founded three years ago by Florida Gov. Rick Scott, whose daughter Allison graduated from the school in 2005.

If the vast amount of information available on the Internet is envisioned as an island, traditional search engines like Google only uncover the very tip. That's why Zhuzhe Zhou and Nan Zhang developed WiseAgg, a search engine for analysts. The engine, which works on a regular computer, scans analytics for beyond what a normal search engine can find, giving the user valuable "deep web" data. The idea was so innovative that judges at GW's fourth annual Business Plan Competition awarded it the top prize of $525,000 in cash and in-kind investments.

Mr. Zhou, a Ph.D. student in the School of Engineering and Applied Science, and Dr. Zhang, a GW assistant professor of computer science, also won the Pieg and Play Tech Award, which will cover travel expenses and tuition for the team to attend a "start-up accelerator" session in Silicon Valley to help refine their business idea.

"The presentations were all very strong and diverse, so we were very excited," Dr. Zhang said. He and his partner went on the prize capital to complete the development of the system, as well as work on customer acquisition. The money will also help cover some data acquisition costs, he said.

Mr. Zhou said there is a lot of development ahead for the team, but he's excited. "This will take some time, but I think it's a promising project," he said.

The winners beat out seven other teams in Friday's final competition. In earlier rounds, the field was narrowed from 144 initial applicants representing all of GW's schools—the largest number of participants in the competition's history—to 32 semifinalists, who were invited to develop full-fledged business plans. All groups were encouraged to take part in educational workshops, feedback and pitch sessions and a mentoring process while developing their ideas, said Jim Chung, director of GW's Office of Entrepreneurship.

The $50,000 second prize went to AthleteTrax, a web-based client management platform for college athletic administrations and student-athletes to increase organization and productivity. The AthleteTrax founders—Joe Halpern, Reinaldo Correa, Elizabeth Zander and Brian Gross, all GW alumni—also won the best undergraduate team award of $10,000 and the Audience Choice Award of $1,000, and the team's total winnings: $21,000. Pilot testing of AthleteTrax using several GW athletic teams will begin next fall, with a test including all varsity teams slated for the spring.

"We were just excited to be in the top eight teams," Mr. Correa said. "We aren't really to go to investors yet, so this money really allows us to delay that and focus on our product!"

The third prize of $4,000 went to Fundify, conceived by junior Dylan Fox. Fundify is an online fundraising platform that allows small organizations without official nonprofit status—such as sports teams and volunteer groups—to raise money while giving incentives to their donors. Fourth prize ($1,000) went to Inquisip Biomedical, started by senior Nathaniel Dijkant and Caitlin Ristig to market their cost-efficient fluoride regulating device for use in medical settings.

George Washington President Steven Knapp presented the Audience Choice Award at a reception following the competition. He called the Business Plan Competition a "signature event" at GW.

"What started here is a very defined way has come to embrace the university, as the university itself adopts an entire culture of entrepreneurship. And that's exactly what we were hoping would happen," he said.

Business Plan Competition Director Adele Rolley, a professor of entrepreneurship who founded the competition, said that over the years, many students had approached her about starting their own businesses.

Business Plan Competition Winners Look to Dig Deeper than Google
April 13, 2012

An assistant professor of computer science and a Ph.D. candidate in the School of Engineering and Applied Science were awarded a first-place $25,000 investment for their business starting Friday in the fourth annual GW Business Plan Competition.

Nan Zhang, who has been teaching at GW for four years, and Zhuzhe Zhou are the teams behind WiseAgg, an analytic tool for digging into the relatively unattacked "deep web"—an area of the Internet consisting of information databases that has been left untouched by major search engines like Google.

"We started with the simple motivation that there are already resources out there, but nobody knows those big-picture views of those databases," said Zhang.

"We found that there are so many deep web resources out there, we can really make some information that people can't easily get today."" said Zhang and Zhou made use of eight right teams that beat out a pool of more than 140 entries to make the final round of the competition, which took place today.

The teams spent the last two months hammering out the details of their infant enterprises, attending workshops and receiving guidance from experienced entrepreneurs with the ultimate goal of jumpstarting their companies and earning a hefty investment.

Zhang said the bulk of the prize money will go toward the further development of the WiseAgg program, supplementing grant money the team already received from the National Science Foundation that assisted their research and helped identify business prospects.

AthleteTrax—a program to help student-athletes keep up with scholarship and maintain high GPAs while traveling for sporting events—placed second with a $10,000 prize. The team included sophomore business school students Jon Halpern, Reinaldo Correa and Elizabeth Zander and Brian Gross. AthleteTrax earned another $10,000 when the four won the best undergraduate prize.

For the first time in the competition's history, an additional $1,000 prize was given to a team determined by votes from the audience. This sum also went to the AthleteTrax project.

Fundify, an online fundraising platform championed by junior Dylan Fox, took third place. Seniors Nathaniel Dijkant and Caitlin Ristig earned fourth place with Inquisip Biomedical, which presented cost-effective biomedical instruments.

The teams' presentations were judged on their originality, financial planning, investment potential and passion for the project, among other criteria.

The competition's $10,000 in total prize money is co-sponsored by Florida Governor Rick Scott, whose daughter is an alumna.

WiseAgg wins $250,000 at GWU Business Plan Competition
April 16, 2012

A "Google for analysts" business pitch took home top honors and $25,000 at the 4th annual George Washington University Business Plan Competition on Friday.

WiseAgg, which collects and analyzes large amounts of data from Web sources not normally crawled by generic search engines, is the brainchild of Zhuzhe Zhou, a GW graduate student and Nan Zhang, a computer science professor. WiseAgg was one of eight finalists that presented their business ideas to a panel of entrepreneurs, investors, venture capitalists and alumni on Friday.

Those eight were selected from an initial pool of 144 teams from various schools and departments across campus, marking a 30 percent increase in participation over 2011. The names-up event was AthleteTrax, an online client management platform for college athletic administrators and their student-athletes.

The GW Business Plan Competition awards more than $50,000 in cash prizes to teams of GW students, faculty and alumni who have innovative ideas for new products or services. The event was founded three years ago by Florida Gov. Rick Scott, whose daughter Allison graduated from the school in 2005.

ANNETTE AND RICK SCOTT

Rick Scott is the 45th governor of the state of Florida and is known for his 7-7-7 Plan to create 700,000 jobs in seven years. He has focused on shrinking the size, scope, and cost of government so the private sector can thrive and create jobs, and Florida’s unemployment rate has dropped or held steady 12 of his first 14 months in office. His administration is working to cut taxes, eliminate burdensome regulation, and make sure Florida has the best-educated workforce.

The son of a truck driver and JCPenney clerk, Rick is considered one of America’s foremost entrepreneurs and an innovator in business, healthcare, and politics. Rick has been married to his high school sweetheart, Ann, for 39 years. They have two wonderful adult daughters, Allison and Jordan.

First Lady Ann Scott was born in Mobile, AL, but grew up in Dallas, TX. She met Governor Rick Scott during her senior year of high school and they have been married for almost 40 years. They have two married daughters, Allison and Jordan, and a four-month-old grandson named Auguste. As an avid reader, the First Lady spends time visiting schools and libraries across Florida, encouraging them to read and write. As a mother, she knows healthy bodies make healthy minds, so she supports health and nutrition. The First Lady also advocates on behalf of foster children and military families in the state of Florida.

Throughout their lives, the Governor and First Lady have been committed to helping their community locally and around the world. Mrs. Scott enjoys interior design in her spare time and has a degree in business administration from Southern Methodist University in Dallas, TX.
